

SAFEasy TYPE 4 LIGHT CURTAINS

- **Integrated light curtains for FINGER PROTECTION**
- **Version with 14 mm resolution**
- **Special slot for device setting**
- **35 x 40 mm compact profile**

SE4 SERIES

The **SAFEasy**[™] light curtains, according to the IEC 61496-1 e IEC 61496-2 standards, are suitable for finger protection of operators exposed to risks.

Different models with six standard heights ranging from 150 to 900 mm, with 14 mm resolution and operating distance reaching 6 m are available.

Specific dip-switches, that can be reached through a slot present on the front of the receiver protected by a lid and opened with a simple screwdriver, guarantee rapid and safe device setting.

The operator is thus able to configure, according to the specific needs, the manual or automatic reset, as well as the muting and partial muting functions.

The emitter-receiver units are optically synchronised and contain all the control circuits, inputs and outputs inside the housing.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy**[™] light curtains, thanks to the extremely compact dimensions (35x40 mm) and easy connection and installation.
